WHY CHOOSE US

With an in-house manufacturing capacity backed with an expert team, LEADING offers uPVC windows and doors in various sizes and durability. Established in the year 2018, LEADING within no time has garnered a niche in the market making it the most sought-after name by architects and builders. We are associated with all international brands that make our windows and doors of world-class standards.

01

Energy Efficient

Being a poor conductor of heat, uPVC window neither retains nor transfers heat indoors. LEADING uPVC windows possess great energy saving potential. Window profiles have been designed with multi-chambers and double gasket sealing reduces transfer of heat further windows and doors fitted with double insulated glass, make the window more energy efficient and saves energy by 30%-35%.

03

Weather Resistant

Our special additives are impact modifier for strength, titanium dioxide for ultra violet rays and heat stabilizers to retain the profile shapes properly at high temperatures.

02

Sound & Thermal Insulation

Windows are made up of multi-chambered profiles which are fusion welded, tight sealed that reduce noise - providing user comfort. Our Windows are sealed with the masonry wall with silicon leaving no gaps between the frame and the sash preventing noise, dust and pollution. we can further improve the sound and thermal insulation quality which again helps in saving energy.

04

Eco Friendly

LEADING uPVC windows & doors are eco-friendly. uPVC is an excellent material for recycling as they can be fully recycled. Being a replacement for wood and energy intensive material, it saves forests and environment.

OUR STATEMENTS

01

Our Vision

Our vision is to build Eco Friendly constructions with special emphasis on spreading awareness in India about sustainable architectural processes. Global environmental concerns need to be flagged and tended to with technological advances in use of construction material.
